

Quick Heal®

Security Simplified

Quick Heal Tablet Security *for Android™ Tablets*

Anti-Theft. Web Security. Data Backup. Real-Time Protection. Performance Monitor. Network Monitor.

Feature List

Quick Heal Tablet Security for Android combines smart protection with anti-theft facility that helps track and control the tablet remotely if lost or stolen. It is easy to use and helps optimize the performance of your device.

Virus Protection

Secures the file system of your tablet from malicious threats. Protection remains active in the operating memory of the device and scans all files that are open or saved including those on the memory card.

- ▶ Ensures automatic protection from all kinds of malware threats.
- ▶ Scans applications as soon as they get installed.
- ▶ Scans adware and helps check any possible applications that display advertisements that consume your balance and Internet usage.
- ▶ If you have to use another memory card, the anti-virus engine scans the memory card before transferring any data.
- ▶ Flexibility to use your tablet device while the scan runs in the background.
- ▶ Allows user to configure the list of applications to be excluded from scanning.
- ▶ Allows users to configure the list of files and folders to be excluded from scanning.

Web Security

Blocks access to fraudulent websites that might phish your valuable information.

- ▶ Block access to infected and malicious websites while you are browsing using the default browser on your tablet.
- ▶ Enables Parental Control to keep a tab on the tablet browsing activities of your children or others using your device.

Device Scanning

- ▶ Helps detect and quarantine any malicious object on your device. A regular scan keeps your device safe from unseen threats.

Anti-Theft

Helps to track, lock and wipe the personal data in case of loss or theft using pre-defined SMS or remotely. You can also wipe selected data remotely by sending a predefined SMS.

- ▶ **Remote Locking** – Blocks usage of your device if it is lost or stolen.
- ▶ **Tablet Tracking** – Helps in locating your lost or stolen device.
- ▶ **SIM Change Notification** – If the SIM is changed, the new number will send an SMS to the owner's alternate mobile number informing about the SIM change.
- ▶ **Block phone on SIM Card Change** – If the SIM card of your tablet is changed after it is stolen, the security suite blocks usage of the tablet.
- ▶ **Remote Data Wipe** – Helps to configure data to be deleted and allows the user to wipe personal data remotely.
- ▶ **Audible alarm on tablet** – Helps find your misplaced tablet.
- ▶ **Trusted SIM** – Is a list of SIM cards that are considered reliable and safe. The device is not blocked if a SIM from the trusted list is being used.

Backup

Take a backup of your personal information such as contact numbers, text messages, calendar events, and pictures with Quick Heal Remote Device Management (RDM) and retrieve it whenever required.

- ▶ Helps to take a backup of your data manually or automatically whenever required.
- ▶ Allows selecting data for backup.
- ▶ Allows you to restore data if it is accidentally deleted or if the tablet device is lost or stolen or destroyed.
- ▶ Deletes old backed up data from cloud that is no longer required. However, once deleted the data cannot be retrieved from the server.

Quick Heal RDM is a cloud-based web portal that helps the user to effectively manage mobile devices. This facility allows you to:

- ▶ **Backup:** Back up data such as SMS, contacts, calendar events, and pictures.
- ▶ **Locate:** Helps locate the device when it is missing.
- ▶ **Lock:** Helps lock the device. Thus, prevents the device from being misused and the data from being exploited.
- ▶ **Wipe:** Helps wipe the data from the device. You can configure the data to be wiped.

Regular Automated Virus Database Updates

Takes automatic virus database updates so that your device remains secure from real-time threats.

Call Blocking

Enables you to block unwanted calls by creating a 'Blacklist' of numbers.

- ▶ Allows you to decide who can call you and whom you want to avoid receiving calls from.
- ▶ Block all non-contact numbers or some specific numbers from calling on your tablet phone by creating blacklists.

SMS Blocking

Enables you to silently block unwanted and spam SMSs such as news, advertisements, marketing messages, and even offensive texts.

- ▶ It scans and filters embedded links in messages.
- ▶ Blocks messages from all non-contact numbers, all contact numbers, and/or non-numeric numbers.
- ▶ Helps to create Blacklist of contacts to block messages and Whitelist of contacts to allow text messages from.
- ▶ Helps to create a list of spam keywords. It blocks the incoming SMS containing any of the keywords added to the list.

Performance Monitor

Allows you to check the functioning of tablet, control power saver, speed up device performance, and view the performance reports.

- ▶ It shows current performance of the device, settings for power saving mode, and all the running applications.
- ▶ Enables Power Saving mode to increase the battery life by adjusting device brightness, killing running applications, and disabling Wi-Fi, Mobile networks, and Bluetooth.
- ▶ Enhances the performance of the device with Speed Up Device feature by stopping the running apps and killing idle apps on a regular basis.

Network Monitor

You can manage the networks that are in use on your device. You can check the current usage of all the networks and control the usage.

- ▶ Provides current data usage of all networks (2G, 3G and Wi-Fi).
- ▶ Helps to set data usage of 2G, 3G and/or Wi-Fi networks in use. Allows setting maximum data usage limit within these networks.
- ▶ Alerts the user if data usage reaches specified limit.
- ▶ Stops network once the data usage reaches the maximum limit.

Messenger

It displays the latest bytes of information and developments from the Quick Heal lab. News about tablet protection, security alerts, other important issues, or events are displayed here.

Reports

Provides information on detected threats, updates, and extensive reports.

- ▶ This feature gives you reports on all the activities carried out by Quick Heal Tablet Security for Android. For example: A detailed SMS report would give you the report of all the blocked SMS.
- ▶ Provides in-depth reports on virus detections, blocked calls, blocked SMS, all activities related to anti-theft, web security including any sites that were blocked, updates taken for virus definitions and backup reports.
- ▶ Allows you to delete reports manually if required.

Trusted SIMs List

Add multiple SIM numbers to Trusted SIMs List. This feature is beneficial for users using multiple SIMs. When SIM is changed, the device is not blocked. Fifty (50) SIM numbers can be added to Trusted SIMs List.

Product Highlights

Intelligent protection for your Android tablet simplifies security and cuts down the risk of data exposure.

- ▶ Stop unwanted advertisements from consuming your credit and Internet data balance.
- ▶ Save time and ensure productivity by effortlessly blocking unwanted calls and unwanted SMSs.
- ▶ Take a backup of all your valuable data on your Remote Device Management (RDM) account.
- ▶ Network Monitor manages the networks that are in use on your device. You can check the current data usage of all the networks and control the data usage.
- ▶ Web Security blocks access to fraudulent websites that might phish your valuable information. Parental Control to keep a tab on the Tablet browsing activities of your children or others using your device.

System Requirements

Quick Heal Tablet Security for Android is designed for installation on Tablet devices. Your Tablet device should have supported versions and resolutions of Android as mentioned below:

▶ **Supported Versions of Android**

Android 2.1, 2.2, 2.3, 3.0, 4.0 and above

▶ **Supported Resolutions of Android**

Small screen: 7 inches - 1024x600, 800 x 480

Large screen: 10 inches - 1280x800

▶ **Important**

Multiple SIM Support

Partial Anti-Theft support for multiple SIM devices.
